### **DETAILED ACTION**

#### ***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

#### ***Remark***

2. Claims 2 and 10-13 have been cancelled. Claims 1, and 3-9 are pending for reconsideration.

#### ***Allowable Subject Matter***

3. Claims 1 and 3-9 have been allowed.

#### ***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest as in claim 1 for a method for improving throughput in a WLAN. The method comprises buffering a set of messages, identifying a target address for the set of messages, and concatenating the set of messages based on the target address. The concatenating comprises: (a) eliminating a sync interval, (b) preserving a message header, (c) transmitting a subsequent message, (d) transmitting the message header and (e) repeating (a) through (d), until a last subsequent message in the set of messages have been sent. Yildiz on col. 12, lines 13-19 describes merely describes a conventional WLAN transmission method in which target stations to which the message is to be directed are determined (they are

Art Unit: 2618

matched using an address field in the message) and under certain conditions a message ID is validated (to ensure that a message that is broadcast/multicast originates in the same basic service set). Thus, this passage does not disclose concatenating buffered messages based on a target address.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
